1

The Problem We Solve

Low Engagement

Many websites and apps struggle to keep people interested and coming back.

Growth Challenges

Businesses want more visitors and better earnings but don't know how to stand out.

Content Fatigue

Boring content loses users; fun experiences keep them engaged.

HTML5 Game Use Cases

01

FREE TO PLAY

Captivate your audience with our H5 games on your platform.

02

LEADERBOARD

Our games help you to make leaderboard on your Platform.

03

COIN/VOUCHER

You can give coins or vouchers to your users through engaging gameplay.
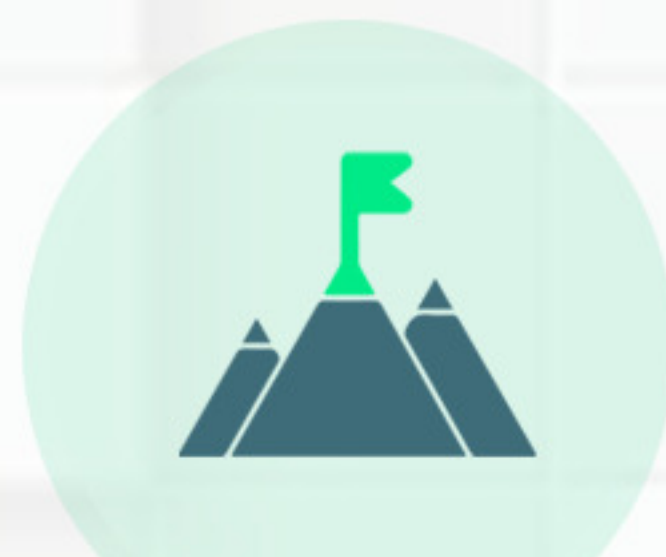

04

GAMIFICATION

Add fun challenges and activities to motivate your users and keep them coming back for more.

05

ACHIEVEMENTS

Reward users with prizes through our Games based on their progress and milestones.

How It Works – The Business Model

Partnership
We partner with businesses (like apps or websites) and share our HTML5 games with them.

Monetization
Clients can either pay a **licensing fee** for game integration or opt for a **revenue-sharing model**, where they share a percentage of earnings from ads or user transactions.

Collaboration
It's a team effort: more fun for users = more traffic and earnings for everyone.

Variety
We make all kinds of games—arcade, casual, sports—so there's something for everyone.
