

ADDING GAMES TO YOUR PLATFORM

PORTAL SOLUTION

STANDALONE GAMES

WHAT IS PORTAL SOLUTION?

A Portal solution is essentially an enormous ready-made HTML5 games library. Thanks to these portals, you and your users can play hundreds of free and exciting yet lightweight games on your platform.

GET STARTED IN 30 MINS

Our Portals can be easily provided to multiple publishers around the world, without necessarily going through the entire development process again. This reusability feature of the portal results in an extremely short turnaround time.

COST EFFECTIVE SOLUTION

New businesses often find themselves in a financially tight spot when it comes to adopting new practices and techniques. Being a one-stop shop for everything involved in game development, we deliver a high-quality portal for you at no cost.

CROSS PLATFORM **TECHNOLOGY**

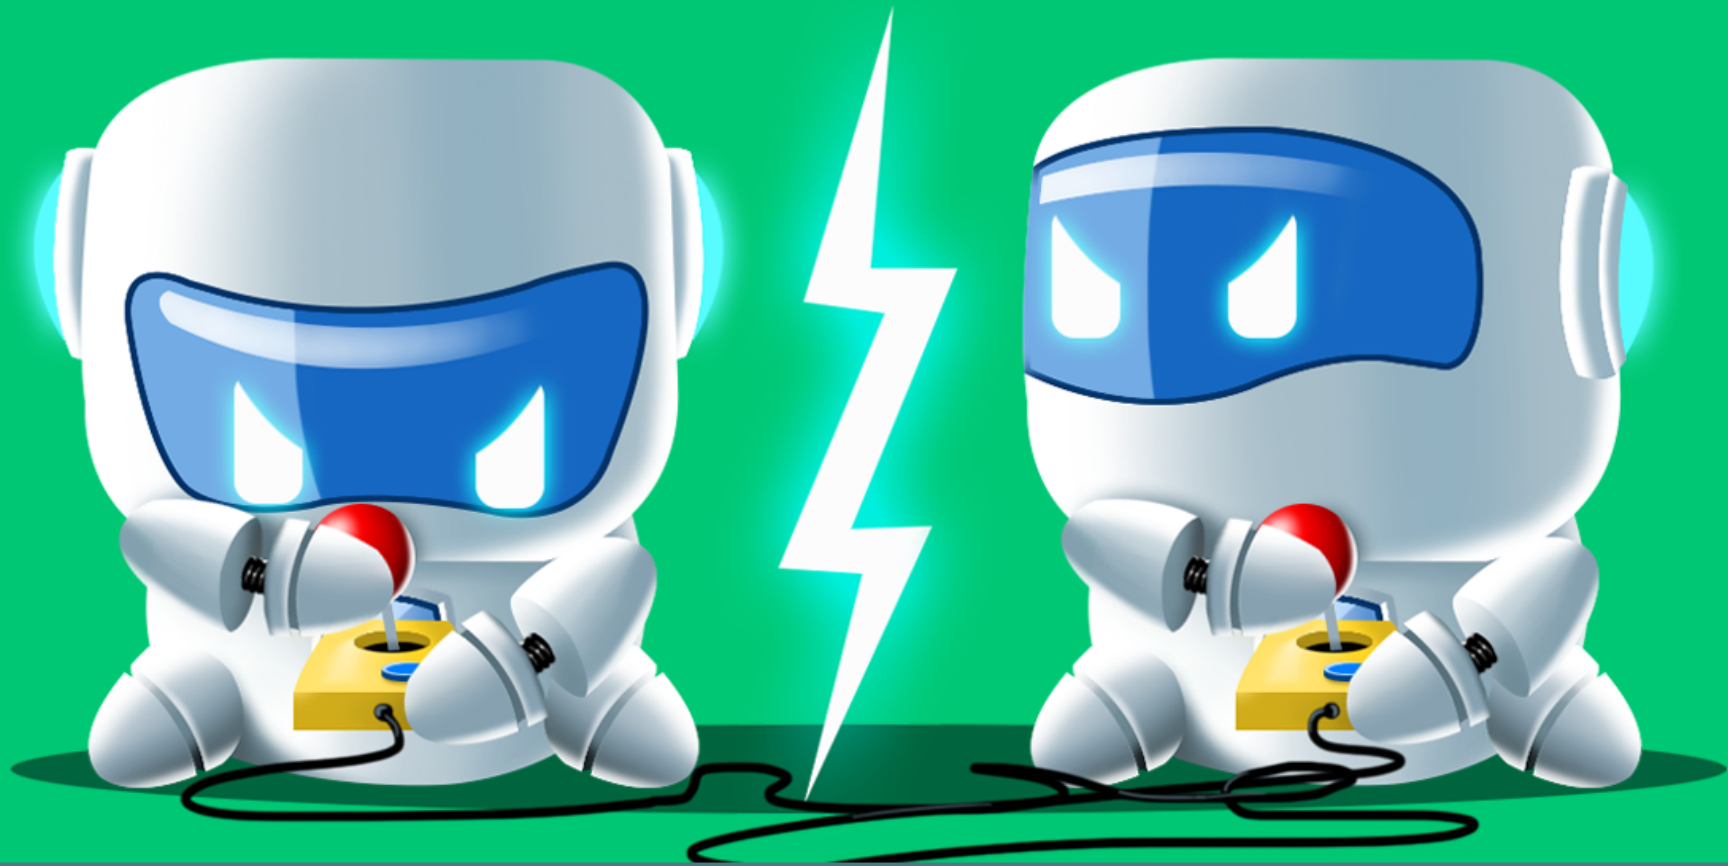

Our HTML5 Games offers cross-platform compatibility to all major modern devices and operating systems, ensuring a similar experience for multiple users.

LOCALIZED CONTENT

Our games also support multiple languages depending on the player's region. We localize our games in a way that makes gaming a delightful experience for diverse audience groups in different locations. With localization people from the different regions can connect themselves with the games effectively.

BATTLE MODE

Our portal consists 20+ exciting battle mode games where you can play with other users from all over the world. We offer you to embed these games individually on your platform to boost your user engagement.

INCREASE USER **ENGAGEMENT**

Our portal can not only do wonders in bringing more traffic to your platform but can also help ensure that your users stay there for extended periods while engaging with what you offer.

ADDITIONAL **REVENUES**

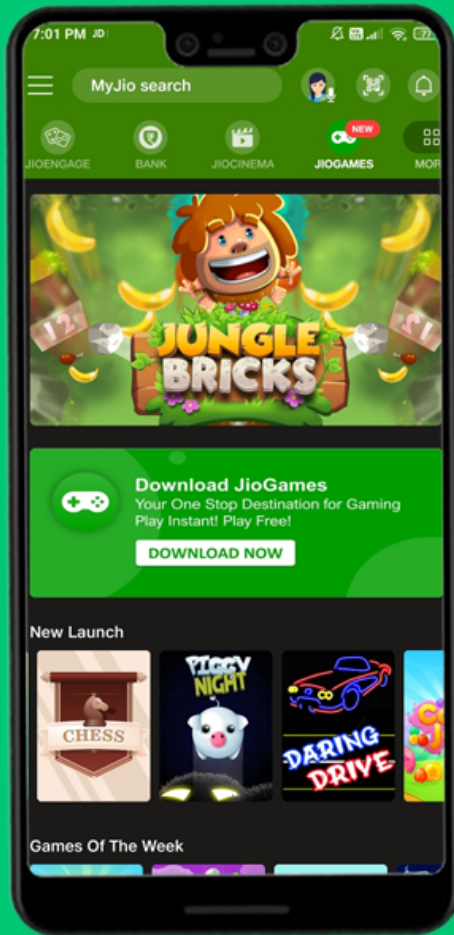

Our portal offers innovative ways from which you can earn a considerable amount of revenue.

STANDALONE GAMES

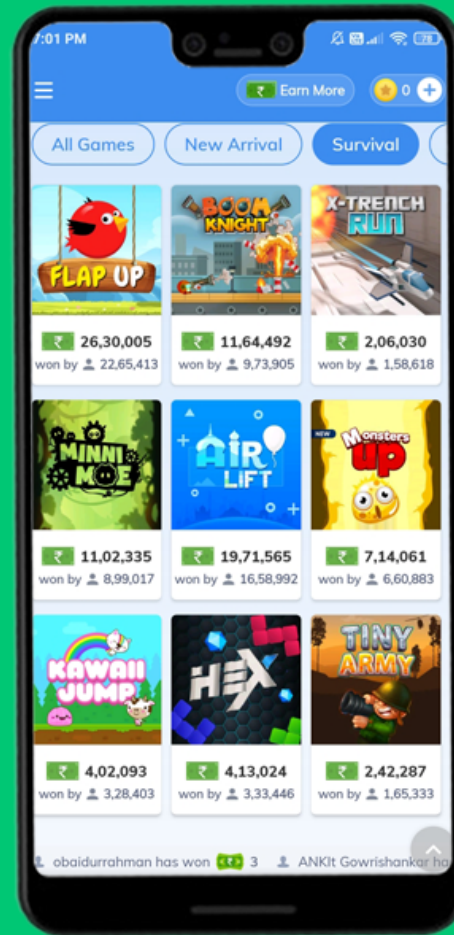

Our portal consists of 100+ HTML5 games that are frequently updated, but if you want to embed a few of our games , then we also give direct links of the individual games with the same deal.
